

The Multicare Clinic Provides an Integrative Approach to Medicine

BY STACEY BOMSER

The Multicare Clinic is a multidisciplinary practice incorporating a variety of holistic services and specializing in difficult to treat health conditions. Patients benefit from having multiple holistic healthcare providers working together as a team to treat complex health issues.

Dr. Scott Denny, PhD, AP, DOM, and Dr. Peter Diamond, D.C., answered some commonly asked questions about their practice, which has been serving the South Florida community for the past ten years.

What is the Multicare Clinic? Our practice provides a unique integrative medical approach to help patients with chronic illness or chronic pain. We are the first pain practice in South Florida to offer Robotic MLS Laser Therapy.

What is MLS Laser Therapy? MLS Laser Therapy uses specific wavelengths of light to treat painful and debilitating muscle, bone and joint conditions. Light energy enters the damaged cells and stimulates inter-cellular activity. This reduces pain

Dr. Scott Denny, PhD, AP, DOM, and Dr. Peter Diamond, D.C.

in the area of injury and speeds recovery of the damaged cells.

What other services to you provide? We offer acupuncture, chiropractic, exercise rehabilitation, we treat sports injuries and motor vehicle injuries, we provide natural pain medicine injections, natural herbal medicine, in addition we offer weight loss programs, massage therapy, vitamin injections, weight loss injections, lifestyle medicine, and Liporay body toning.

What distinguishes you from other practices? Most practices offer one or maybe two types of services and most do not have a collaborative approach to maximize patient treatment results. This is why we have succeeded with difficult cases. For example, a patient with knee arthritis will benefit from MLS Laser Therapy, combined with acupuncture, even with cases that are considered "bone-on-bone." Or, let's use the example of a patient with diabetes and neuropathy; not only can we improve the blood sugar issues with our lifestyle medicine program, we can combine acupuncture, chiropractic and MLS Laser Therapy to improve nerve function, increase circulation and dramatically reduce pain

in a matter of weeks. This allows the patient to feel better, need less medication, and significantly improve their quality of life. This comprehensive approach is simply unavailable in most clinics.

Is there anything else you would like readers to know about the Multicare Clinic? Since we receive so many inquiries for so many types of health conditions, we need some time to review the medical records and review the health history before recommending a course of treatment. But, we still offer a complimentary consultation. So stop suffering alone and allow us to get you back on track.

The Multicare Clinic is located in Davie at 2215 S. University Drive. The practice is open Monday through Saturday. To schedule an appointment call 954-473-8925. For more information visit www.multicareclinic.org.
